

# Nome Airport

*Master Plan Update*

You are invited!

The State of Alaska Department of Transportation and Public Facilities (DOT&PF) is conducting two projects at the Nome Airport, which serves as a regional hub for the Seward Peninsula, Norton Sound and surrounding villages.

**Nome Airport Master Plan Update** — AKSAS Project No. 62748. DOT&PF is updating the airport master plan to identify and address the facility's current and future needs. The updated plan will guide modernization, expansion and development of the existing airport for the next 20 years.

**Nome Airport Runway Safety Area Expansion Project** — AKSAS Project No. 61413. DOT&PF is also evaluating options for runway safety area improvements at Nome Airport to meet FAA standards.

These projects have reached important milestones and it is time to check in to gain public input. Come to the DOT&PF public open house. You may also want to visit the web site [www.nomeairport.com](http://www.nomeairport.com) for more information or to comment online.

## Public Open House

Wednesday  
June 2, 2010

5-7 pm
